

Automation—Something To Fear Or To Welcome—Is Here To Stay

By Charles W. White
(CPC Correspondent)

You will be hearing more and more about this new thing called "automation." Industry is talking about it. Every country is talking about it. It is the new thing that is going to take the place of the old thing. It is the new thing that is going to take the place of the old thing. It is the new thing that is going to take the place of the old thing.

Automation, as defined by the automobile manufacturers, is the automatic handling of parts being processed through manufacturing operations. At an auto engine plant in Cleveland, they have an auto-

fully automatic precision now. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

Electricity does not control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

The Mystery Of R.C.'s Big Trees

There are few records remaining today of the big trees that once grew in the lower mainland near Vancouver. One of the largest trees recorded was a Douglas fir that measured 10 feet in diameter with a bark of half an inch. It had an overall height of 437 feet.

The Canadian Forestry service has a section of the forest that Douglas fir trees were found in 1926. There are still many of these trees in the forest. They are still growing and they are still being cut down.

On such a line it takes only a few minutes to cut down a tree. The machine is used to cut down the tree. The machine is used to cut down the tree. The machine is used to cut down the tree.

Paints Church Mural To Show Appreciation

BURNABY, B.C.—A. McManis, 40-year-old Burns artist is painting a large mural for St. John's Lutheran Church here in appreciation of his volunteer work during the past year.

The mural, roughly shaped like a cross, is 22 feet wide and 36 feet high, arching to the roof over the altar. One side is devoted to the Crucifixion and the other to the Resurrection.

During his career McManis has painted many murals. He has painted many murals. He has painted many murals. He has painted many murals.

He is not only a painter, but a sculptor, singer and violinist.

When he landed in Canada, he had \$35. He did some quick painting to buy himself a few dollars. He did some quick painting to buy himself a few dollars.

Control Power (Continued)

few tool operators to do work that formerly required teams of expert machinists—and what's more important, machine tool work is done more accurately, faster, easier and cheaper.

That's just one example. There are a few other factors that are making machine tool work a big industry in the future. They are making machine tool work a big industry in the future.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

GENES OF THOUGHT

I value this delicate hereditary as one of the finest gifts a parent can bestow.

Every home where love abides and friendship is a gift to the world. It is a gift to the world. It is a gift to the world. It is a gift to the world.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

HOUSING IN CANADA

Of the dwellings built last year, one in four was for rental purposes. This was a record for Canada. It was a record for Canada. It was a record for Canada.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

Salts In The Laundry

To remove mildew from linen, salt and soap, powdered chalk or starch and lemon juice are used. It is used to remove mildew from linen. It is used to remove mildew from linen.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

Mother Finds Housewrecking Easier Than Being A Waitress

VANCOUVER.—When Mrs. Minnie Popple was interviewed by a reporter here, she was crying. She was crying. She was crying. She was crying.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

Stories Of Sou'ris Pioneer Told To Historical Society

Back in 1851, a pioneer on his way to British Columbia, arrived in Vancouver. He arrived in Vancouver. He arrived in Vancouver. He arrived in Vancouver.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

TRY AND STOP ME!

Unfortunate father had a son who was a trouble maker. He was a trouble maker. He was a trouble maker. He was a trouble maker.

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

LICK-AND-A-PROMISE

After strenuous exercise or during a hot day, a person may feel thirsty. It is a feeling of thirst. It is a feeling of thirst. It is a feeling of thirst.

MORE THAN SKIN DEEP

It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine. It is the use of electronic devices to control the machine.

Immunize my kid?

Don't you suppose your child is a little thingy as disease. It is a little thingy as disease. It is a little thingy as disease.

BRAND WRESTLER—Child by a bull

London, writes out in the school's book, the 10-year-old boy, who had been wrestling a bull, was killed. It was a tragedy. It was a tragedy. It was a tragedy.

REVOLVES AROUND EYES

The planet Mercury revolves about the sun like the moon. It is the same way. It is the same way. It is the same way.

URGES DEVELOPMENT OF RESERVATIONS-HELP TO BOTH INDIANS AND TAXPAYERS

World Happenings In Pictures

JUNIOR CHAMPIONS—Saskatoon Tech school won back for Saskatchewan the Canadian junior curling championship when they defeated Manitoba 10-7 in a sudden-death playoff, after the two rivals ended with the same number of wins at the end of the championship schedule with other provinces of the Dominion.

A BRIGHT PROSPECT for Canada's 10,500 employees loomed suddenly with the completion of months of negotiation and the recent announcement that the government will award a \$315,000,000 contract for 50 Bristol Britannias to the Montreal company. The initial order will be for \$35,000,000 which will cover general engineering costs in preparation for building the world's largest airliner, and for production of the first 20 planes, plus the initial building of two prototypes which will take anywhere from one to two years to construct. The Britannia will become a replacement for the now obsolete World War II Lancaster, and before production can begin, an agreement with Bristol Aeroplane Co. of Britain will have to be negotiated. In this respect, it is understood that license arrangements are going forward with the British company. The photos above and below show the plane.

RICE-PADDY FISHERMAN—A rice farmer in Kedah, Malaya, hopefully drags a fishing net into the shallow moat surrounding his rice paddies. The net is supported by bamboo poles.

BEAUTY AND HER BEASTS—Hollywood mad-maker, Millicent Patrick stands before a mirror with one of her creations on her head, shoulder to her right. The one at right, called the "Old Man" will soon be seen in a science-fiction thriller.

COOL CRUISER—With the non-chalance of a veteran sailor, lovely Donna Gardner smiles from the sighting of one of the Sunshine Sailing Regatta entries. The shapely lass was recently named queen of the annual affair at Miami, Fla.

5-RING CURRICULUM—Taking their education with a grain of sandal, two Florida State University students rehearse their act prior to their school's recent student circus. The aerial acrobats are shown above with Coach Jack Harkin.

EVERYBODY WINS—Richard HOLCOMBE, 12, gets acquainted with his new little puppy in a Memphis, Tenn., courtroom. A few minutes before Dick wasn't so happy. General Sessions Judge Robert Hoffman, Jr. in a Solomon-like decision, had ruled that the youngster would have to return a cat he had found and grown to love. But his Honor made everybody a winner when he presented this purchased pup to Dick.

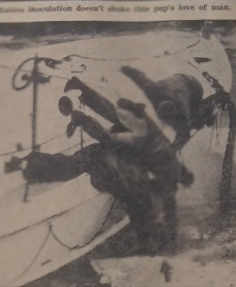

AWARDED HERE—For Jacob Epstein, museum curator, holds the Order of the British Empire after he received it from Queen Mother Elizabeth at Buckingham Palace.

FISHY STORY—Chickadee fish almost be one of the main features on the Canadian menu. One ocean, inland lakes and rivers provide excellent food of this kind that is considered good for us in other countries, yet we, as a people, are not great fish eaters. In four of our provinces, fishing is a major industry.

Dogs Lead Hectic Life In The Windy City

A dog's life in Chicago, Ill., recently was not a very easy one. It all started when two rabid dogs bit 10 persons in 16 hours. Strays were ordered picked up and inoculated against the disease. While some of the dogs weren't too appreciative of man's efforts to save them from rabies, others, like the one at left shown kissing veterinarian Edith M. Marchant, refused to let their love for man be shaken by the momentary price of an injection needle. And, while the Windy City warred on rabies, time was taken out by the Anti-Cruelty Society of Chicago and the Coast Guard to rescue a mongrel who wandered out onto the icy waters of the Chicago River—and couldn't get back. When cooking failed to bring the dog ashore, three sailors hung from a Coast Guard cutter, lower left, and pulled the dog, arrow, from the water. Sam Manganer of the Anti-Cruelty Society is shown at lower right, holding the frightened dog in a leather jacket after the rescue.

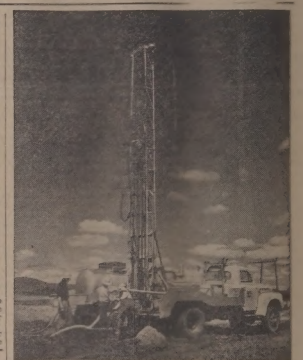

Rabid inoculation doesn't shake this pup's love of man.

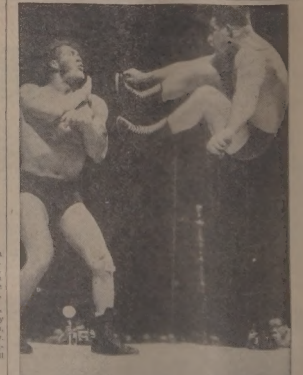

Three sailors hang from a Coast Guard cutter, lower left, and pulled the dog, arrow, from the water.

AWARDED HERE—For Jacob Epstein, museum curator, holds the Order of the British Empire after he received it from Queen Mother Elizabeth at Buckingham Palace.

OIL EXPLORATION last year in Saskatchewan by Imperial Oil has continued at record levels. Geological parties and seismic crews have been active in many parts of the province. Here a seismic drilling crew near Arcola is reeling its mobile rig before drilling a shot hole. By timing shock waves created by underground explosive seismic crews can often map the contour of rock formations far below ground.

SKY HI GETS LAID LOW—an Australia's Pat O'Connell falls through the air with a flying drop-ship. O'Connell defeated Sky Hi Lee in the latter's Madison Square Garden debut.

striking the rest of the country with his excellent fare in fresh, frozen, canned or smoked variety. Fish supplies cod, haddock, salmon, phosphorus and iron—all essential to health.

Nearly 20 vitamins that are known or believed to be important to human well-being have thus far been discovered.
